AUG 26 1999

Dear Mr. Breitenbach, 8-18-99

I am a Sierra Club member
and am writing on the issue of
California water resources.

Please try conservation before
considering dams and reservoirs.

Restore flow to the Bay and Delta.
People who use water must pay - don't
ask for taxpayer subsidies for
unnecessary new projects.

Please make realistic projections
of future water needs, including
potential savings from conservation.

Thank you.
